### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by the Japanese patent document no. 2002-135838 and the English language Patent Abstract, thereof.

According to the English language Abstract, the Japanese reference discloses a radio signal generated by a device in the entrance of an off-limit photography area to restrict photographing or flash use. Outside the entrance a radio signal is generated to cancel the off-limit signal. The device of this reference performs all the functions of applicant's invention and thus meets all claimed elements and steps.

3. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Ichikawa et al. (U.S. Patent Application Publication 2004/0046871 A1).

In Fig. 2, for example, Ichikawa et al. discloses a radio frequency signal generator to disable a camera unit, and at the exit is another radio signal transmitter that re-enables the camera. Ichikawa et al. performs all the functions of applicant's invention and thus meets all claimed elements and steps.
